Technical Requirements:

- 1、 It is made of polymer composite materials,
and the materials should meet the corresponding standards;
- 2、 The compressive strength is not less than 600MP,
and the flexural strength is not less than 150MP;
- 3、 The withstand voltage is greater than 100KV,
and the breakdown voltage is not less than 120KV;
- 4、 Temperature resistance: 180° C;
- 5、 Straightness is not more than 1mm/m;
- 6、 When the cone surface is matched with the coupling,
the large end is in contact, and the contact surface is greater than 70%,
and the taper tolerance is controlled by a special gauge;
- 7、 Both ends allow to retain the center hole or retain the process boss,
length ≤ 4 .
